Professional Summary

- Java Backend Developer (MCA, 9.0 CGPA) who builds and tests fault-tolerant backend services with Java 17, Spring Boot, Kafka, Redis, and MySQL.
- Built a Kafka-driven workflow engine with Redis distributed locking, exponential-backoff retries, and DLQ routing, and failure-tested it by killing workers mid-task.
- Cut book-listing p95 latency from 2.9 s to under 0.4 s with Redis caching (k6); delivered secure REST APIs with JWT, RBAC, and Razorpay payments, tested with JUnit 5, Mockito, and Testcontainers.

Technical Skills

Languages: Java 17, SQL
Backend: Spring Boot 3.x, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT, RBAC
Microservices: Spring Cloud, Eureka, Spring Cloud Gateway, Resilience4j
Messaging: Apache Kafka (Consumer Groups, Dead Letter Queues, Retry and Recovery)
Databases and Caching: MySQL, Redis
Testing: JUnit 5, Mockito, MockMvc, Testcontainers, k6
DevOps and Tools: Docker, Docker Compose, Git, Maven, Swagger/OpenAPI
Problem Solving: Data Structures and Algorithms; 180+ LeetCode problems (82 Medium, 11 Hard)

Projects

FlowForge: Distributed Workflow Orchestration Platform GitHub | Architecture Diagram
Java 17, Spring Boot, Apache Kafka, Redis, MySQL, Eureka, Spring Cloud Gateway, Resilience4j, Docker, Testcontainers

- Designed a Kafka-driven DAG workflow engine using Spring Boot microservices, Eureka, and Spring Cloud Gateway, with DFS-based cycle detection to reject circular workflows.
- Implemented Redis distributed locking (SET NX with Lua token-verified unlock) to prevent duplicate task execution across concurrent workers.
- Built exponential-backoff retries, dead-letter queue routing, and a scheduler to re-queue tasks stuck in DISPATCHED state.
- Failure-tested a multi-instance Docker deployment by terminating workers and interrupting Kafka mid-execution, verifying recovery with no duplicate completion.
- Scaled workers with Kafka consumer groups; added 30 unit tests and 2 Testcontainers integration tests.

Library Management System: REST API GitHub | Architecture Diagram
Java 17, Spring Boot, Spring Security, JWT, MySQL, Redis, Docker, JUnit 5, Mockito, Swagger/OpenAPI

- Built 45+ REST endpoints with ADMIN, LIBRARIAN, and USER roles enforced via Spring Security and `@PreAuthorize`; implemented JWT access/refresh tokens with rotation and logout blacklisting.
- Benchmarked book listing with k6 (50 VUs, 60 s, local Docker): Redis caching raised throughput from ∼30 to ∼160 req/s, cut p95 latency from 2.9 s to under 0.4 s, and reduced MySQL row reads by ∼96%.
- Added scheduled reports, overdue reminders, and token cleanup; containerized the app with Docker Compose and wrote 30+ tests (JUnit 5, Mockito, `@WebMvcTest`, `@DataJpaTest`).

E-Commerce Backend: REST API GitHub | Architecture Diagram
Java 17, Spring Boot 3.5.4, Spring Security, JWT, MySQL, Redis, Razorpay, JUnit 5, Mockito, Swagger/OpenAPI

- Built 50+ REST endpoints covering users, products, carts, orders, payments, reviews, wishlists, and analytics; documented with Swagger/OpenAPI.
- Integrated Razorpay: order creation, payment verification, transaction tracking, and webhook handling.
- Implemented JWT with refresh-token rotation, logout blacklisting, and BCrypt hashing; added Redis caching with eviction on updates, sales analytics, low-stock tracking, and async email notifications.

Internship Experience

Python Developer Intern, Synchro Serve Global Solution 2024 | 3 Months

- Automated daily CSV-to-MySQL ingestion, reducing execution time from 2 hours to 4 minutes.
- Built and tested 5 Python utilities for data validation, duplicate detection, and MySQL audit logging.
- Found SQL injection risks in two scripts and replaced string-concatenated queries with parameterized queries.

Data Analytics Intern, Sri Vensy Technologies 2025 | 3 Months

- Cleaned and transformed 5 datasets with Python and Excel; built 4 Tableau dashboards for sales and operational KPIs.

Education

MCA, VEMU Institute of Technology (Autonomous) 2024–2026 | CGPA: 9.0/10
B.Sc. (Mathematics, Physics, Computer Science), Margadarsi Degree College 2021–2024 | CGPA: 8.1/10
Intermediate (MPC), Priyadarshini College 2019–2021 | 509 Marks/1000
SSC, Government High School 2018–2019 | CGPA: 9.8/10

Certifications

SQL and Relational Databases, IBM Cognitive Class | Data Analytics Essentials, Cisco Networking Academy
